## Plum

**5 health benefits of eating plums**

One medium-sized fresh plum contains 113 mg of potassium, a mineral that helps manage high blood pressure and reduce stroke risk.

If that isn't heartwarming enough, the reddish-blue pigment in some plums, called anthocyanins, may protect against cancer by mopping up harmful free radicals.

# Acerola

## What are acerola cherries?

Acerola cherries provide more vitamin C than all other food sources, according to the U.S. Department of Agriculture.

Acerola juice is such a rich source that MedlinePlus warns against drinking the juice if you also take vitamin C supplements. Whether you know them as acerola cherries or by one of their other names, such as Barbados cherry and West Indian Cherry, chances are you'll only find them as supplements.
